

Built for the Miles You Put In

A full shift on ramps, jet bridges, and aisles asks a lot of your feet. Store-bought insoles are built for an average foot, not yours, so they flatten out fast and stop giving you anything back.

Custom insoles are shaped to your exact foot, helping you offload the pressure of standing and walking so the strain doesn't spread to your shins, hips, and back. That's real support for the job you do every day, at an exclusive JetBlue crewmember rate.

- ✓ Quick 5-minute foot scan
- ✓ No doctor's visit required
- ✓ Personalized support designed just for you
- ✓ Exclusive JetBlue crewmember pricing at \$150 per pair
- ✓ Amazing fit guarantee, or we rebuild them for free

GET STARTED IN PERSON

Hike will be onsite at select JetBlue open enrollment sessions throughout October to help crewmembers scan and order in person.
